DETAILED ACTION

1. Amendment received on June 29, 2004 has been acknowledged. The Examiner notes that Applicants' response raises a restriction issue. Therefore an action to that effect follows:

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-15, 29-33, drawn to "a method and system for reverse control of a wireless mobile device."
 - II. Claims 16-28, drawn to "an apparatus for capturing control of a wireless mobile device."

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I, transmits for a vendor device to a wireless device a program to taking control of the wireless device's display function whereas the product device in invention II, uses a microprocessor for recognizing a wireless device presence and takes electronic control of the wireless device to send and receive data from the wireless device. See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, and because these inventions

Art Unit: 3627

have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lynda Jasmin whose telephone number is (703) 305-0465. The examiner can normally be reached on Monday- Friday (8:00-5:30) alternate Fridays off.
